**DETAILED ACTION*****Response to Arguments***

Applicant's arguments with respect to claim 25 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 25 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 4,426,155 to Monchalin.

As to claim 25, Monchalin discloses an interferometer including (see Figure 1 below, also **column 9, lines 49-61**):

means for propagating beams simultaneously or successively in a coincident relationship (see **column 9, lines 49-61**) and in the same direction along an optical path which undergoes a change in length and means responsive to interference in said beams for measuring wavelength of an input beam with respect to a reference beam.

***Allowable Subject Matter***

Claim 26 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to claim 26, the prior art of record, taken alone or in combination, fails to disclose or render obvious an interferometer for measuring wavelength of a beam of unknown wavelength with respect to a reference beam of known wavelength which comprises means for propagating said beams simultaneously or successively in a coincident relationship along an optical path that undergoes a change in length, including an oscillatory bar having at least one retroreflector and a fixed mirror for defining an optical path that undergoes said change in length, in combination with the rest of the limitations of claim 26.

Claims 1-22 and 24 allowed.

The following is an examiner's statement of reasons for allowance:

As to claims 1-22 and 24, see reasons for allowance previously presented in Paper 05272004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2877

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
